Dashboard Simplification & Cleanup

A complete, plain-language record of design improvements, wording fixes, and screen optimizations made to the Shaikshik Samwaad Dashboard.

Prepared for: RSK Madhya Pradesh & Peepul Review Team | **Dashboard Version:** Live Production (v2026.11) | **Date:** November 2026

We undertook this cleanup to solve two practical problems. First, the earlier dashboard took up excessive vertical space on standard laptop screens, forcing users into continuous scrolling just to see basic charts. Second, several section titles, buttons, and survey questions used confusing, bureaucratic, or technically inaccurate terms. The sections below detail every wording change, layout improvement, and metric correction implemented to make the platform clean, fast, and easy to present.

1. Word-by-Word Terminology Changes

Every single word or label replaced across the dashboard is cataloged below by topic:

A. Removal of the Word 'Cadre' (कैडर)

> • **Top Slicer Toolbar**
>
> **Previously:** "CADRE / ROLE: All Stakeholders"
>
> **Changed to:** **"ROLE: All Participants (भूमिका: सभी प्रतिभागी)"**
>
> **Reason:** Removed the rigid bureaucratic word 'cadre'. Replaced with 'participants' and 'roles' to make the control respectful and practical.

> • **Overview KPI Headline Strip (Card 5)**
>
> **Previously:** "TRAINERS & OBSERVERS CADRE (सुगमकर्ता एवं पर्यवेक्षक कैडर)"
>
> **Changed to:** **"TRAINERS & OBSERVERS (सुगमकर्ता एवं पर्यवेक्षक)"**
>
> **Reason:** Removed 'cadre' from headline cards and tooltips to keep the top-level numbers clear and focused on people.

> • **District 360 Facilitator Roster (Tab 2)**
>
> **Previously:** "Master Facilitator Cadre (मास्टर फैसिलिटेटर कैडर)"
>
> **Changed to:** **"Key Facilitators (मुख्य सहजकर्ता)"**
>
> **Reason:** Adopted standard department terminology used by district and block education officers.

> • **District & Block Breakdown Visuals**
>
> **Previously:** "Block-wise Cadre Bifurcation & Cadre Comparison Card"
>
> **Changed to:** **"Block-wise Role Breakdown & Role Comparison Card"**
>
> **Reason:** Cleaned chart titles and card headers to describe specific participant roles rather than abstract administrative cadres.

> • **Turnout Percentage Formulas**
>
> **Previously:** "Effective Cadre Turnout Rate (%) / कुल कैडर"
>
> **Changed to:** **"Teacher Attendance Rate (%) / लक्षित संख्या"**
>
> **Reason:** Framed turnout around actual teachers attending school sessions rather than administrative units.

B. Removal of Technical Jargon ('Saturation', 'Defaulters', 'Distractor')

> • **Statewide Headline Metric (Card 1)**
>
> **Previously:** "Universe Saturation % (संवर्ग संतृप्ति दर)"
>
> **Changed to:** **"Teacher Coverage Rate % (शिक्षक कवरेज दर)"**
>
> **Reason:** 'Saturation' sounded clinical and confused field officials. 'Coverage' directly communicates the percentage of teachers reached.

- **Longitudinal Model (Tab 11)**

Previously: "Longitudinal Saturation Trajectory (समग्र संतृप्ति अंतराल)"

Changed to: **"Two-Cycle Reach & Growth Trajectory (समग्र कवरेज अंतराल)"**

Reason: Describes two-cycle progress in plain language so viewers understand teacher reach across August and September.

- **District Monitoring Alerts**

Previously: "Stalled Districts / Defaulter List (रुके हुए जिले - Defaulters)"

Changed to: **"Priority Support Districts (प्राथमिकता वाले जिले)"**

Reason: Replaced punitive 'defaulter' labeling with constructive support framing aligned with administrative governance standards.

- **Pedagogy Insights Banner (Tab 7)**

Previously: "Diagnostic Distractor Deconstruction Grid"

Changed to: **"Pedagogical Insights & Common Misconceptions"**

Reason: Replaced academic psychometrics research jargon with straightforward classroom teaching concepts.

C. Survey Question Options Cleanup (Tab 5)

- **Question 73 (Female Teacher Attendance Count)**

Previously: "1 - बिलकुल अच्छा नहीं (Poor) ... up to 5 - बहुत अच्छा (Excellent)"

Changed to: **"0 प्रतिभागी, 1 से 10 प्रतिभागी, 11 से 20 प्रतिभागी, 21 से 30 प्रतिभागी, 30 से अधिक प्रतिभागी"**

Reason: A counting question (asking how many female teachers attended) had accidentally inherited a 1–5 satisfaction rating scale during data ingestion. Replaced with authentic attendance volume brackets.

- **Question 49 (District Orientation BAC/BRC Attendance Count)**

Previously: "1 - बिलकुल अच्छा नहीं (Poor) ... up to 5 - बहुत अच्छा (Excellent)"

Changed to: **"0 प्रतिभागी, 1 से 5 अधिकारी, 6 से 10 अधिकारी, 10 से अधिक अधिकारी"**

Reason: Corrected the same rating scale error on officer attendance figures.

D. Navigation, Localization & Security Wording

- **Navigation Tab 7 Title**

Previously: "Governance & Administrative Directives (प्रशासनिक निर्देश / चेतावनी)"

Changed to: **"Recommended Measures (💡 7. अनुशंसित सुझाव)"**

Reason: Reframed administrative warnings as supportive, actionable recommendations.

- **Reporting Month Slicer (Top Header)**

Previously: "REPORTING CYCLE: August 2026 | September 2026 | Consolidated"

Changed to: **"🗓️ रिपोर्टिंग चक्र: 🗓️ अगस्त 2026 | 🗓️ सितंबर 2026 | 🌐 समेकित (अगस्त + सितंबर)"**

Reason: Enabled complete Hindi localization so switching the language toggle translates month selectors seamlessly.

- **Top Utility Action Buttons**

Previously: "Print Executive View / Strategic Briefing"

Changed to: **"🖨️ प्रिंट करें (Print) / 💡 कार्यपालक रणनीतिक ब्रीफिंग"**

Reason: Added dual Hindi-English translation support across all top toolbar utility controls.

- **Dashboard Access Gate**

Previously: "Visible hint on screen: 'Hint: RSK.2026' with simple password 'RSK.2026'"

Changed to: **"Hint removed from screen; updated to secure password 'RSK#2026.Samwaad@MP'"**

Reason: Prevented unauthorized public access by removing on-screen password hints and enforcing a robust alphanumeric key.

2. Data Accuracy & The 52-District Work Universe Fix

In the 52-District Teacher Attendance & Reach Matrix (Tab 10 / Tab 11), several districts showed impossible reach percentages ranging from 380% to 3,645%. This happened because the table was using only the School Education Department's Middle School Varg-2 baseline (which lists only 18 teachers for Alirajpur and 11 for Anuppur, because tribal schools are recorded under a separate tribal department roster), while the attendance count included teachers from all schools.

To fix this, we applied the exact formula used on the first page across the entire 52-district matrix: **District Work Universe = max(Facilitator Ground Target, Department Varg-2 Baseline)**. This immediately brought all districts into authentic, realistic percentages:

- **Alirajpur:** Previous reach was 2,694.4% (based on universe of 18). Corrected to **67.3%** (485 unique attendees out of 721 work universe).
- **Anuppur:** Previous reach was 3,645.5% (based on universe of 11). Corrected to **36.4%** (401 unique attendees out of 1,102 work universe).
- **Barwani:** Previous reach was 2,870.4% (based on universe of 27). Corrected to **50.4%** (775 unique attendees out of 1,538 work universe).
- **Dhar:** Previous reach was 380.9% (based on universe of 299). Corrected to **53.5%** (1,139 unique attendees out of 2,130 work universe).
- **Dindori:** Previous reach was 1,503.6% (based on universe of 28). Corrected to **61.5%** (421 unique attendees out of 684 work universe).
- **Jhabua:** Previous reach was 2,188.5% (based on universe of 26). Corrected to **41.3%** (569 unique attendees out of 1,377 work universe).
- **Mandla:** Previous reach was 1,934.1% (based on universe of 44). Corrected to **50.0%** (851 unique attendees out of 1,703 work universe).
- **Statewide Alignment:** Total Work Universe is now **84,066** teachers statewide. Cumulative unique teacher reach across both cycles stands at **40.3%** (33,876 verified unique teachers).

3. Layout & Screen Concision Improvements

To eliminate unnecessary scrolling and make key metrics immediately visible, we streamlined the dashboard's layout:

- **Authentic Field Photo Watermark:** Replaced the generic computerized header canvas with an authentic photograph of Madhya Pradesh teachers gathered in a Samwaad circle dialogue, softened with a subtle dual-gradient overlay.
- **Single-Row Slicer Toolbar:** Compacted the top control bar from 172px (which wrapped across 3 rows on standard laptops) into a single 42px row, saving 130px of vertical space right at the top fold.
- **Slim Horizontal KPI Strip (Tab 1):** Reorganized 6 large cards stacked in two bulky rows (388px high) into a single row of 6 slim cards (104px high), allowing headline coverage, attendance, and pedagogy metrics to fit in a single glance.
- **Standardized Chart Heights:** Reduced oversized charts (formerly 380px to 634px high) down to a calibrated 240px to 260px height. Chart labels remain completely readable while vertical page length was cut by nearly 45%.
- **Elimination of Blank Space in Survey Explorer (Tab 5):** Combined the question selector and summary banner into a single row, and matched the chart and response breakdown heights (270px each). This eliminated a 570px blank void and reduced tab height by 36.2%.
- **Two-Column Grid in Recommended Measures (Tab 7):** Replaced an extremely long single-column layout extending 6,803px (over 7 full screen scrolls) with a balanced two-column grid (3,222px high), cutting scrolling by 52.6%.
- **Dismissible Question Tooltip Popovers:** Fixed an issue where hovering over question badges left popover dialogs frozen on screen. Tooltips now dismiss smoothly when the mouse leaves, when clicking outside, or upon pressing Escape.

4. Summary of Space Savings (Verified in Chrome)

The table below summarizes the exact pixel measurements before and after the concision pass:

Section / Element	Before Height	Now Height	Space Saved	Net Impact
Top Slicer Toolbar	172 px	42 px	-130 px	**75.6% vertical space saved**
Overview KPI Ribbon (Tab 1)	388 px	104 px	-284 px	**73.2% screen space saved**
Overview Tab Total Height	4,048 px	2,787 px	-1,261 px	**31.2% page reduction**
Survey Questions Tab (Tab 5)	1,754 px	1,119 px	-635 px	**36.2% reduction (void removed)**
Recommended Measures (Tab 7)	6,803 px	3,222 px	-3,581 px	**52.6% reduction in scrolling**

Summary Prepared for Team Reporting & Leadership Review

All simplifications and data reconciliations have been verified on the production build and published live to GitHub Pages.
