CLASSROOM PEDAGOGY & MISCONCEPTION MATRIX

Score: 72.8 / 100

Activity Trap Misconception (Q95)

48.1% Trapped

Critical Deficit: 48.1% of teachers believe hands-on activities guarantee learning without cognitive synthesis.

Classroom Belonging Misconception (Q97)

66.1% Misguided

2 in 3 teachers equate belonging with praising correct answers rather than normalizing intellectual struggle.

Intellectual & Psychological Safety (Q96)

62.0% Aligned

Strong baseline recognizing student mistakes as primary diagnostic entry points for remediation.

Structured Peer Dialogue vs Monologue (Q98)

54.2% Structured

45.8% of classrooms still default to teacher monologue rather than structured student group dialogue.

THREE HIGH-LEVERAGE STRATEGIC DIRECTIVES FOR RSK LEADERSHIP

Action Roadmap FY25-26

1 Single-Scan Digital Attendance: Deploy individual Samagra/M-Shiksha Mitra QR check-in to close the 44.6k unreachable teacher gap and distinguish target cohort from general Varg-2.

2 Cluster Observer Rebalancing: Enforce mandatory CAC/BRC rotation covering the 1,688 zero-monitoring clusters to eliminate blindspots and ensure high facilitation fidelity.

3 Misconception-Driven Agendas: Pivot next Samwaad from generic activity delivery to deconstructing Q95 (Activity Trap) and Q97 (Belonging Trap) with practical video anchors.
