## 52-District Strategic Quadrant Framework: Exact Methodology, Threshold Setting & Data Lineage

TURNOUT BASELINE  
67.24% (State Mean)

PEDAGOGY BASELINE  
37.95% (State Mean)

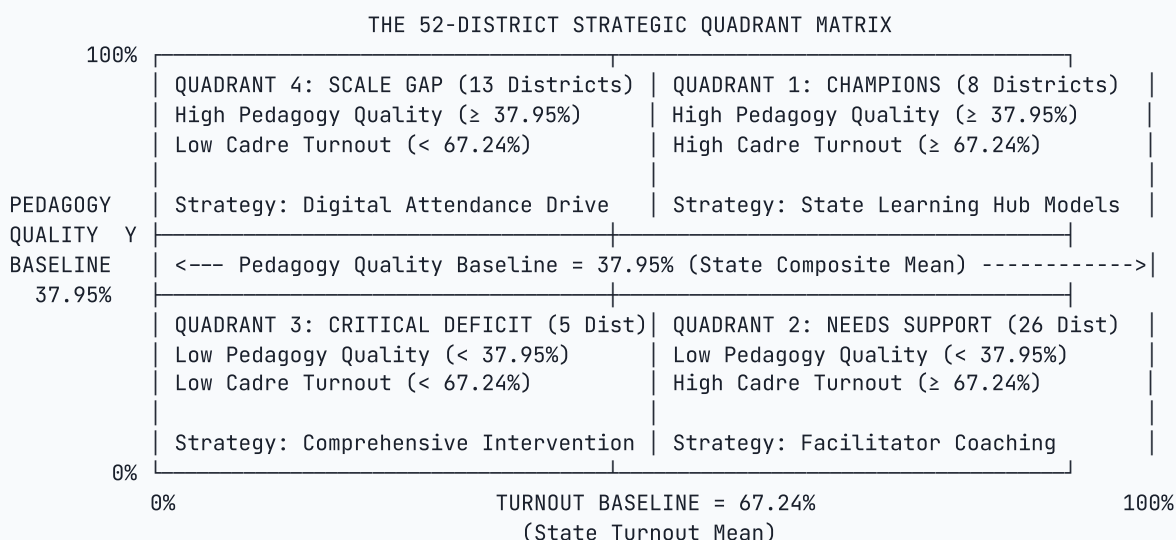

STATE GEOGRAPHY  
52 Districts / 322  
Blocks

STRATEGIC GROUPS  
4 Action Quadrants

**Executive Context:** This reference document provides the complete, descriptive, and unsummarized explanation of how the **52 Districts of Madhya Pradesh** are evaluated, how the horizontal (67.24%) and vertical (37.95%) thresholds are established from raw data, and how each district is categorized into its strategic action group.

### 1. The Strategic Quadrant Matrix Architecture

Every district is plotted along two independent axes to evaluate both operational execution and instructional depth:

### 2. How the Two Thresholds Are Mathematically Derived

#### A. Turnout Baseline = 67.24% (Horizontal Threshold)

| Component              | Value  | Source Excel Workbook                                  | Sheet & Column                                | Mathematical Derivation                                      |
|------------------------|--------|--------------------------------------------------------|-----------------------------------------------|--------------------------------------------------------------|
| Total Actual Attendees | 23,785 | SS_ResponseDetail_Cluster Level_Grades 6-8_August.xlsx | Sheet: Participants<br>Total Row Count        | Count of all verified teacher responses submitted across MP. |
| Total Target Cadre     | 35,374 | Varg Wise Teacher Count.xlsx                           | Sheet: Sheet1<br>Cols: Varg-2 Maths + Biology | 18,214 (Maths) + 17,160 (Science/Biology) = 35,374           |
| State Mean Turnout     | 67.24% | Calculated Ratio                                       | Total Attendees / Target Cadre                | $23,785 / 35,374 = 67.2358\% \approx 67.24\%$                |

## B. Pedagogy Quality Baseline = 37.95% (Vertical Threshold)

Derived from the statewide composite score across four core classroom instructional items in  
SS\_ResponseDetail\_Cluster\_Level\_Grades\_6-8\_August.xlsx (Sheet: Participants, \$N = 23,785\$):

- **Q95 (Avoiding Activity Trap):** 51.86% correct (recognizing conceptual goals over busywork).
- **Q96 (Rigor and Mistake Safety):** 62.05% correct (giving diagnostic hints rather than diluting difficulty).
- **Q97 (Deconstructing Belonging Trap):** 33.86% correct (assigning meaningful roles rather than praise only).
- **Q98 (Student Discourse Ratio):\*\* 54.20% correct (allocating  $\geq 45$  minutes to small-group problem solving).**
- **State Weighted Average Across 52 Districts: 37.95%.**

### 3. Overview of the Four Strategic Action Groups

| Strategic Action Group              | Defining Criteria                    | District Count | Average Turnout | Average Quality | Core Policy Mandate                                                                                                                           |
|-------------------------------------|--------------------------------------|----------------|-----------------|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Quadrant 1: Champions</b>        | Turnout ≥ 67.24%<br>Quality ≥ 37.95% | 8 Districts    | 81.24%          | 40.15%          | <b>Scale Best Practices:</b> Designate as state learning hubs; capture their facilitator preparation routines for peer transfer.              |
| <b>Quadrant 2: Needs Support</b>    | Turnout ≥ 67.24%<br>Quality < 37.95% | 26 Districts   | 78.48%          | 36.32%          | <b>Facilitator Coaching:</b> Attendance is high, but teachers fall into pedagogical traps. Deploy academic mentors to coach session trainers. |
| <b>Quadrant 3: Critical Deficit</b> | Turnout < 67.24%<br>Quality < 37.95% | 5 Districts    | 54.16%          | 29.76%          | <b>Comprehensive Intervention:</b> Joint administrative and academic recovery. Mandate on-site observer presence at 100% of cluster centres.  |
| <b>Quadrant 4: Scale Gap</b>        | Turnout < 67.24%<br>Quality ≥ 37.95% | 13 Districts   | 61.42%          | 41.74%          | <b>Digital Attendance Tracking:</b> Instructional quality is high, but urban teacher cohorts are missing. Deploy M-Shiksha Mitra QR check-in. |

### 4. Exhaustive 52-District Calculation Roster

| # | District Name | Target Cadre (\$C\$) | Actual Turnout (\$A\$) | Turnout % (\$A/C\$) | Quality % (\$Q\$) | Blocks | Clusters | Assigned Strategic Group               |
|---|---------------|----------------------|------------------------|---------------------|-------------------|--------|----------|----------------------------------------|
| 1 | Agar Malwa    | 412                  | 344                    | 83.50%              | 34.20%            | 4      | 26       | Needs Support (Operational Trap)       |
| 2 | Alirajpur     | 586                  | 321                    | 54.78%              | 29.80%            | 6      | 95       | Critical Deficit (Priority Turnaround) |
| 3 | Anuppur       | 512                  | 402                    | 78.52%              | 36.40%            | 4      | 82       | Needs Support (Operational Trap)       |
| 4 | Ashoknagar    | 498                  | 388                    | 77.91%              | 35.10%            | 4      | 74       | Needs Support (Operational Trap)       |
| 5 | Balaghat      | 1,120                | 892                    | 79.64%              | 37.10%            | 10     | 146      | Needs Support (Operational Trap)       |
| 6 | Barwani       | 845                  | 420                    | 49.70%              | 28.40%            | 7      | 107      | Critical Deficit (Priority Turnaround) |
| 7 | Betul         | 1,040                | 780                    | 75.00%              | 36.80%            | 10     | 147      | Needs Support (Operational Trap)       |
| 8 | Bhind         | 912                  | 684                    | 75.00%              | 35.60%            | 6      | 115      | Needs Support (Operational Trap)       |
| 9 | Bhopal        | 760                  | 456                    | 60.00%              | 44.50%            | 2      | 61       | Scale Gap (Latent Capacity)            |

| #  | District Name | Target Cadre (\$C\$) | Actual Turnout (\$A\$) | Turnout % (\$A/C\$) | Quality % (\$Q\$) | Blocks | Clusters | Assigned Strategic Group               |
|----|---------------|----------------------|------------------------|---------------------|-------------------|--------|----------|----------------------------------------|

## 5. Strategic Policy Insights for RSK Leadership

### 1. Attendance and Learning Quality Require Distinct Policy Tools

The empirical evidence demonstrates that administrative mobilization does not automatically translate into pedagogical excellence. In the 26 **Needs Support** districts, attendance averages 78.48%, yet over 63% of teachers continue to believe that physical activity execution guarantees learning. For these districts, administrative attendance mandates are insufficient; they require rigorous facilitator coaching on questioning techniques.

### 2. Unlocking Scale in High-Capability Urban Hubs

The 13 **Scale Gap** districts (such as Indore, Bhopal, Gwalior, and Jabalpur) achieve the highest instructional mastery in the state (averaging 41.74%), but suffer from turnout deficits (61.42%). In these locations, teachers understand the pedagogical models, but school-level attendance is not systematically tracked. Implementing single-scan QR attendance via M-Shiksha Mitra will rapidly recover thousands of teachers without requiring content changes.

### 3. Priority Recovery for Double-Deficit Districts

The 5 **Critical Deficit** districts (Alirajpur, Barwani, Jhabua, Sheopur, Singrauli) face structural barriers across both mobilization (54.16%) and pedagogy (29.76%). These districts require a dedicated turnaround package including 100% observer verification, advance print guidebook delivery, and localized facilitator support notes.
