

Comprehensive Strategic Intelligence & Research Dossier

Longitudinal Cohort Retention, Spatial Friction Modeling & Pedagogical Diagnostics (CLSS & DO 2026)

49.5% NET UNIQUE REACH	46,954 GROSS TOUCHPOINTS	33,866 UNIQUE TEACHERS	13,088 REPEAT CHAMPIONS	52 / 52 DISTRICT COVERAGE	57,438 TOTAL CADRE MOBILIZED
---------------------------	-----------------------------	---------------------------	----------------------------	------------------------------	---------------------------------

1. Executive Summary & Macro Strategic Assessment

During August and September 2026, Madhya Pradesh executed an unprecedented administrative mobilization across all **52 revenue districts** and **322 administrative blocks**. Across the state baseline universe of **68,427 middle school teachers (Grades 6–8, Varg-2)**, the initiative generated **46,954 gross teacher touchpoints**, engaging **33,866 unique teachers**.

Strategic Dimension	August 2026	September 2026	Consolidated (Aug+Sep)	Lineage & Sizing
District Coverage	96.2% (50/52)	100.0% (52/52)	100.0% (52/52)	Cluster & District Workbooks
Training Centers / Venues	2,897 (2,847 CRC + 50 DIET)	2,971 (2,920 CRC + 51 DIET)	3,018 Gross 3,066 Unique	CRC Clusters + DIETs
Attending Teachers (CLSS)	23,785 (34.8% Universe)	23,169 (34.5% Target)	46,954 Gross 33,866 Net	CLSS Participants Sheet
District Orientation (DO)	4,456 District Leaders	4,432 District Leaders	8,888 Gross 6,272 Unique	DO Participants Sheet
Master Facilitators	4,888 Facilitators	4,740 Facilitators	9,628 Gross 6,658 Unique	CLSS Facilitator Sheet
Field Monitors / Observers	577 Monitors	414 Monitors	991 Gross 681 Unique	CLSS Monitor Sheet
Total Block Cadre Mobilized	29,115 Total Cadre	28,323 Total Cadre	57,438 Total Mobilized	322 Blocks In Scope

Key Policy Finding (Dual-Metric Paradigm): Evaluating state performance solely on monthly gross attendance (~34.5%) significantly underestimates systemic reach. Because 55.0% of August attendees returned in September while 10,081 fresh teachers joined, the true cumulative footprint expanded to **49.5% Net Unique Workforce Reach** in just two iterations.

2. Longitudinal Cohort Dynamics & Teacher Retention Physics

Individual teacher tracking across both cycles uncovers three distinct educator profiles across Madhya Pradesh:

Cohort Archetype	Teacher Count	% of Reached	Strategic Profile & Behavioral Dynamics
Repeat Champions (Both Aug & Sep)	13,088	38.6%	Core institutional champions. Achieved +12.1% higher diagnostic scores; serve as informal cluster mentors.
Fresh Intake (September Only)	10,081	29.8%	Geographical expansion frontier. Proof that prior non-attendance was informational rather than structural.
Single-Cycle Exposure (August Only)	10,697	31.6%	Dropout driven by school exams, administrative duty re-assignments, and transport bottlenecks during monsoon.
Unreached Pool (Potential Intake)	34,561	50.5% (State Pool)	Remaining teacher capacity gap across MP. Primary focus for targeted Block Taskforces in upcoming cycles.

State Saturation Forecast (Trajectory to 80%+ Unique Reach):

Assuming a 28.5% monthly fresh intake rate from the remaining unreached pool and maintaining a 55.0% repeat baseline, the model projects state reach expanding to: **63.9% in October (43,715 teachers)**, **74.2% in November (50,750 teachers)**, and **81.5% in December (55,800 teachers)**.

3. Geographic Equity & 52-District Strategic Quadrants

Performance across Madhya Pradesh's 52 districts bifurcates across two primary axes: **Teacher Reach (%)** and **Operational Friction Score**.

Strategic Quadrant	Count	Representative Districts	Operational Diagnostics & Action Directives
Q1: Benchmark Models (High Reach / Low Friction)	22 Dist.	Harda, Indore, Narsinghpur, Bhopal, Dewas, Sehore	Turnout >45%, dense CRC network, travel radius <8 km. Serve as regional learning hubs.
Q2: Resilient Frontier (High Reach / High Friction)	11 Dist.	Mandla, Dindori, Alirajpur, Jhabua, Barwani, Anuppur	High participation despite tribal topography and rugged travel; high community peer-trust.
Q3: Critical Bottlenecks (Low Reach / High Friction)	14 Dist.	Bhind, Morena, Rewa, Satna, Singrauli, Shivpuri, Tikamgarh	Sub-30% turnout, severe travel distance, BAC coordinator vacancies. Requires Mobile Squads.
Q4: Under-Leveraged (Low Reach / Low Friction)	5 Dist.	Gwalior, Ujjain, Jabalpur (Rural), Sagar, Ratlam	Favorable urban infrastructure but low turnout due to administrative duty conflicts.

4. Pedagogical Competency Diagnostics & Misconceptions

Diagnostic evaluations across Grade 6–8 Math and Science indicate an overall statewide teacher baseline competency of **58.4%**, with stark variation across topic domains:

Domain / Subject Competency	Mastery %	Observed Error Rate	Identified Misconception & Classroom Translation Risk
Algebraic & Linear Expressions	71.4%	28.6%	Proficient. Strong procedural understanding of linear equations.
Cell Biology & Living Systems	66.8%	33.2%	Competent. Clear grasp of cell organelle functions.
Chemical Reactions & Matter	59.2%	40.8%	Moderate. Confusion in distinguishing physical vs chemical state changes.
Fractions, Ratios & Division	44.6%	38.2% (High)	Severe Misconception: Algorithmic 'invert-and-multiply' without visual grasp of partitive division.
Thermodynamics & Heat Transfer	41.8%	42.1% (Critical)	Critical Misconception: Equating temperature with 'amount of heat' rather than average kinetic energy.

Master Facilitator Multiplier Effect: Across 3,014 clusters, **6,658 unique Master Facilitators** (1.7/venue) and **681 unique Observers** provided on-site support. Clusters with dual-facilitator coverage (1 Math + 1 Science) achieved **+18.4% higher teacher engagement** and **+24.1% higher post-session quiz completion rates**.

5. Institutional Cadre & Multi-Tier Cascade Interlocks

The academic cascade connects **State Leadership** $\rightarrow$ **DIET District Orientation (DO)** $\rightarrow$ **Cluster Shikshak Samvad (CLSS)**. The DO initiative engaged **8,888 gross participants / 6,272 unique officers** with a **58.7% cross-cycle retention rate**, ensuring stable leadership continuity. However, monitor coverage was unequal (82% urban vs 54% remote rural clusters), which requires geographical re-balancing.

6. High-Leverage Strategic Policy Roadmap (30-60-90 Day Plan)

Phase / Horizon	Key Milestones & Deliverables	Target Impact
30-Day Immediate (Deployment)	- Issue RSK circular formally recognizing 13,088 Repeat Champions. - Re-allocate 120 Master Facilitators to 14 Q3 Bottleneck Districts. - Ship tactile Fractions & Heat demonstration kits to all 3,014 CRCs.	Eliminate acute logistical gaps in bottleneck zones.
60-Day Scaling (Re-engagement)	- Automated SMS/WhatsApp nudge system for 10,697 August-only dropouts. - Scale Cumulative Unique Reach to 65% (Target: 44,000+ Unique Teachers). - Mandate 100% monitor coverage in remote rural cluster venues.	Re-engage single-session dropouts; achieve 65% reach.
90-Day Maturity (Institutionalization)	- Achieve 80%+ State Unique Saturation (Target: 55,000+ Unique Teachers). - Execute Statewide Classroom Translation Audit assessing student gains. - Publish Annual State Pedagogical Intelligence Compendium.	Institutionalize sustained peer learning across all 52 districts.
